pulled from 50K+ Amazon reviews.

WHAT HAPPENS BETWEEN THE REVIEW AND THE ANSWER

Nothing here is a prompt to a chatbot. Four models do four narrow jobs, each one checkable on its own, and every judgement call is frozen to a file that lives in version control.

STAGE ONE — BUILD A TAXONOMY FROM THE DATA, NOT FROM A WORKSHOP

STAGE TWO — MEASURE EVERY SENTENCE AGAINST THAT FIXED TAXONOMY

Audited, not asserted 102 sentences judged by hand: 88.2% theme accuracy (CI 80.6–93.1), 95.1% polarity. Two earlier designs scored 56.2% and 82.4% and are documented.	Claims checked mechanically Every number in every generated brief is parsed and matched to its evidence before it renders. 103 claims, 0 unmatched — and it has caught real errors.	Runs anywhere No API key, no vendor, no per-call cost. Every model is open-weight and runs on a laptop GPU; outputs are committed so the dashboard opens instantly.
---	---	---

EIGHT CATEGORIES, AND THE WORD EACH ONE IS LOSING ON

Not the most common words — the most **decisive** ones, measured by weighted log-odds: how much more characteristic a word is of a one-star review than a five-star one. Larger chip = harder evidence. Every word is drawn from the data, none chosen by hand.

Coffee4.2★ · 634 rev COMPLAINT VOCABULARY weak · serving · description · machine · artificial · pods LOYALTY VOCABULARY morning · rich · blend · smooth · aroma Five of the six sharpest complaints are strength or format — not bad coffee, an unset expectation. Publish intensity, grind and cup size per pod.	Snack4.34★ · 558 rev COMPLAINT VOCABULARY sea salt · oil · greasy · cardboard · salt LOYALTY VOCABULARY calories · low · gluten free · butter · fat Salt and frying oil are the named defects; “cardboard” is the texture verdict. Cut the salt load; lead the copy on calories and gluten-free.	Drink4.16★ · 436 rev COMPLAINT VOCABULARY natural · smell · worth · pack · received LOYALTY VOCABULARY energy · refreshing · real · water · lemon “Natural” is the most decisive complaint word in the category (z = −3.0). The claim reads as a taste promise and misses. Substantiate it or sell energy instead.	Baby & Pet4.17★ · 431 rev COMPLAINT VOCABULARY china · stopped · problem · upset LOYALTY VOCABULARY dog loves · healthy · training · teeth · diet “China” is the strongest complaint signal anywhere in the dataset (z = −4.2). Disclose sourcing on pack; market the animal's own verdict.	
Tea4.38★ · 334 rev COMPLAINT VOCABULARY peach · green tea · brewed · weak · smell LOYALTY VOCABULARY mint · hot · cinnamon · honey · ice Failure is SKU-specific — peach and green, not the range. Reformulate two lines and leave a loyal category alone.	Candy4.27★ · 285 rev COMPLAINT VOCABULARY artificial · money · sugar · pieces · diabetic LOYALTY VOCABULARY dark chocolate · cherry · cereal · treat · fresh Artificial sweetness plus count-for-price. “Diabetic” sits on the complaint side — a sugar-free line is being asked for by name.	Condiments4.13★ · 236 rev COMPLAINT VOCABULARY artificial · sour · processed · xylitol · mix LOYALTY VOCABULARY coconut oil · sugar free · hot sauce · bbq The sweetener is the whole fight: “xylitol” and “processed” against “sugar free”. The same claim wins or loses on which sweetener you pick.	Protein Snacks3.88★ · 137 rev COMPLAINT VOCABULARY expiration date · description · date · bag · texture LOYALTY VOCABULARY hazelnut · almond · bar · fruit · bbq Lowest-rated category at 3.88★ — and not one complaint word is about the recipe. Dates, bags, descriptions. This is a fulfilment problem.	
Same board, any channel Two models per message: which aspect, how negative. Nothing here is specific to food or to stars.	Live comments Which thing a spike is about, within minutes — a pricing backlash separated from an outage.	Support tickets Friction inside “satisfied” tickets, weighted against renewal rather than the survey.	App & marketplace Features named in five-star reviews — the input a star-weighted dashboard discards.	Guardrails Abstains when the sample is thin, publishes its 88.2% error rate, claims no causation.
